co-working

---

In the ex distillery complex of Pietrasanta street, close to the center of Milan, between Bocconi University, IED Fashion and Prada Foundation, we have opened a studio with professional equipment, available for hours, for days or for weeks.

The modern studio, where fashion, advertising and video production have already taken place, opens its doors to students' projects too.

---

You can use your or our equipment or rent it from our professional photographic and video suppliers.

Ask for a makeup artist, stylist, video operator, set assistant, a digital photography technician or a tutor (photographer pro) to help in your work.
